

# ANNOUNCING: THE END OF A RELATIONSHIP MEANS BIG ADVANTAGES FOR YOU

U.S. Coating Solutions is no longer a representative of WonderPaint, Inc. All products they've sold over the past 4 years were manufactured and supplied by WonderPaint. We are the originator of the products and cross-linking technologies on which they are based.

- Multi-Poly = ASA603 CEP a styrene resin formulation developed by our chemist over 20 years ago as a concrete ad-mixture.
- Crete-Coat= LikeNu we can show you church steps where we applied thin-film concrete coating 15 years ago.
- Liquid Roof = ASA 606 one of the first ever acrylic roofing products with US Patent #4,870,796 awarded 19 years ago for an application method.
- Ex Coat = Wonder 25 based on a concept proposed by our associate the late Don Kelly 15 years ago and derived from ASA 606 technology.

We are developing a website [www.clpcoatings.com](http://www.clpcoatings.com) which has a complete cross reference chart. You can also visit our main site [www.wonderpaint.com](http://www.wonderpaint.com) to review most of the products available.

Our products are engineered by Eric Hart, a chemist with 40 years of material science experience and named on several US Patents. Application consulting is available from Jim Shofstall, a NACE Certificated Coating Inspector with 25 years of coating experience. Our prices are less than you've paid for the exact same products from USCS. (See included price list.) If your order amounts are over \$1,000 then there are considerable discounts available.

We'll give you:

- Knowledgeable application advice.
- Direct access to our chemist for technical answers and possibly specially designed formulations to your specification.
- If you choose to sell product based on the volume differential you are welcome to do so.
- High tech, high end products for the contractor and artisan who want the availability to the highest performance products in the market place.

To reiterate, any product you get from US Coating Solutions today is NOT a WonderPaint formulation. If you've liked the products you've received in the past then we would like to continue to provide them to you. If you've had problems with those products then we'd like to know that also. Please contact us via [www.wonderpaint.com](http://www.wonderpaint.com) or toll free phone 877 493-8969.
